The exchange platform (i.e. Binance) acts as a middleman - it connects you (your offer or request) with that other person (the seller or the buyer). With a brokerage, however, there is no other person - you come and exchange your crypto coins or fiat money with the platform in question, without the interference of any third party. When considering cryptocurrency exchange rankings, though, both of these types of businesses (exchanges and brokerages) are usually just thrown under the .

Coinbase is a secure online platform for buying, selling, transferring, and storing digital currency.

Authentic exchange platforms set up stringent verification procedures to protect the exchange as well as its users from laundering and all other forms of scams. The vast majority of crypto trading platforms require some ID verification before a user can withdraw or deposit funds. Some legit exchanges, nonetheless, will allow you to remain anonymous.
