Orion Protocol is, just like all other cryptocurrencies, a risky investment. It does have higher probability of going up than down because of the good use case, well-designed tokenomics, active community and a solid team behind it. How much will Orion Protocol be worth? For the short-term future, it could reach \$6.01.

CoinBits is one of the most creative platforms in the 21st century, as depicted by the nature of the solution it seeks to provide in the market. This platform is designed in such a way that it invests for you on Autopilot. The process relied upon to make this happen is easy and understandable.

So CoinBits is just another unregulated forex broker, which means the customers are not protected, and there is highly likely they will get away with your hard earned money and there will be no regulating agency to hold them responsible. How does it work? Usually unregulated forex brokers work in the following way.
