Audius. (. AUDIO.) AUDIO is a governance and staking token that powers the Audius decentralized music streaming platform. Artists can upload their music directly to the Audius platform for listeners to access for free. Network providers then host the content and provide the backend infrastructure for content serving.

This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.

In case of any issues please contact Simplex support. Once payment is completed, you can check your payment status on Simplex. The crypto amount quoted is based on the current rate and is not final. If the rate changes by more than +/-2.5% you will be asked to reconfirm the transaction via email from Simplex.

Moving averages are among the most popular Polymath price prediction tools. As the name suggests, a moving average provides the average closing price for POLY over a selected time period. For example, a 12-day simple moving average for POLY is a sum of POLYs closing prices over the last 12 days which is then divided by 12.
