BEP20 Tokens are the tokens that are created by means of the BEP20 standard. BEP20 coins are quickly compared to the other blockchain tokens, experts in the blockchain community said. Only the BINANCE SMART Chain will create and implement the BEP20 standard coins. Therefore, this type of token is compatible with both conventional ERC20 and BEP2 .

While ERC20 tokens are based on the Ethereum blockchain, BEP20 tokens are built on BSC, and TRC20 tokens are based on the TRON blockchain. All three networks use the same solidity language, which means they are mostly cross-compatible and can be used interchangeably, with tokens developed on one platform accessible on others.
