Crypto arbitrage is a form of trading that involves simultaneously buying and selling cryptocurrencies from different exchanges. Arbitrage traders make profit from crypto price differences between exchanges. This involves buying assets for the lowest price available and selling for the highest. The process of arbitrage trading usually gives relatively small returns on each trade. Also, traders must place their orders extremely fast in order to have advantage among other players.

The CoinbaseCryptocurrency List of supported Crypto can be found by opening their mobile APP and going to the Price Page. Then click on the Tradable assets tab.
