The Ravencoin blockchain requires miners to solve computational puzzles that most hardware is capable of solving. The blockchain ensures that the puzzles dont increase too fast, or that it eliminates possible miners from the process. Developing a special mining algorithm isnt new, and it encourages decentralization.

Crypto arbitrage is a form of trading that involves simultaneously buying and selling cryptocurrencies from different exchanges. Arbitrage traders make profit from crypto price differences between exchanges. This involves buying assets for the lowest price available and selling for the highest. The process of arbitrage trading usually gives relatively small returns on each trade. Also, traders must place their orders extremely fast in order to have advantage among other players.
