What is Venus? Venus is an exclusive protocol running on Binance Smart Chain that enables lending, borrowing, and credit on digital assets. Venus tends to form a better Defi ecosystem than centralized and even decentralized exchanges in cryptocurrency. From its operation, Venus permits consumers to invest against collaterals.

As with all emerging DeFi projects, Venus has the advantage of being one of the first lending platforms on the Binance Smart Chain. However, it is by no means the only one. Two other emerging protocols that are offering or are going to offer lending/borrowing services are ForTube and planet.finance.
