The Ravencoin blockchain requires miners to solve computational puzzles that most hardware is capable of solving. The blockchain ensures that the puzzles dont increase too fast, or that it eliminates possible miners from the process. Developing a special mining algorithm isnt new, and it encourages decentralization.

An API Key can be considered as a username. This is generated by the exchange once you declare your settings. An API Secret or API Private Key is simply another string of characters that must be used in combination with the API Key to establish the connection. An additional security layer can be added by generating an API Passphrase. While the API Key and Secret are generated by the exchange, the Passphrase is commonly generated by the user.
