Solana aims to improve blockchain scalability by using a combination of proof of stake consensus and so-called proof of history. As a result, Solana claims to be able to support 50,000 transactions per second without sacrificing decentralization. SOL is not yet available on Coinbase.com or via our Consumer mobile apps. We will make a separate announcement if and when this support is added.

Because Solana is so fast, congestion and fees remain low. Developers hope high speeds and low fees will eventually enable Solana to scale to compete with centralized payment processors like Visa. Solanas native cryptocurrency is SOL. Its used to pay transaction fees and for staking. SOL is available to buy and sell via exchanges like Coinbase.
