KIN has one major advantage over all other cryptocurrency projects: its parent company KIK has a huge active user group already in place, which is a huge plus for the coin in terms of usage. There are several social media blockchain startups, but none of them have large user bases, or even a working product at this time.

Here, the code for the automated trading in ThinkOrSwim is quite simple: plot signal = if close >= 195 and close < 200 then 1 else 0; This lets us place the order conditions, and you may link it to something like the ask to avoid overpaying or even the mid-price, and set this as a GTC order. If it gets filled, fantastic.

Kin is built, grown, and governed by us, the developers who make up the ecosystem. We are a diverse group

ranging from small startups to billion dollar apps. We have the scars of building for platforms that change their minds, and we have resisted the temptation to turn our users into the product. We built Kin to change the game.

To do this, you can use Thinkorswims thinkScript function, a suitable programming language that allows you to port your trading methodology to the platform. Individual craftsmen create their own special scripts that can be written in the terminal to create an individual indicator. Having the right scripts can help you a lot in your trading.
