What is fiat? Fiat also called fiat money or fiat currency, which is the legal currency established in the constitution of a country and issued and circulated by the government of that country. For example, the US legal currency is the US dollar, and the Chinese legal currency is the RMB. Since it is a government-issued currency that has no inherent value, the source of the value of fiat currency is that fiat currency owners believe that currency can continue to maintain purchasing power.

The wallet you get with a basic account is also a Coinbase wallet, even though it is not called that. That is de facto because you get a wallet with the basic account whether or not you ever get the app. If you don't get the app, then the only "coinbase wallet" you have is the one on coinbase.com. This

differentiation is bullshit.

Types of crypto exchange fees. Cryptocurrency exchanges charge fees on different types of user behavior: Trading Fees the primary source of revenue for exchanges. They are typically charged on both fiat-crypto trades as well as crypto-crypto trades. Deposit/Withdrawal Fees some exchanges charge fees for deposits and/or withdrawals. Deposit fees vary based on the type of deposit but are less common than withdrawal fees since exchanges want to incentivize users to fund their account.

Bridge Oracle produces its own wallet software that is available for download on its website, which allows you to store Bridge Oracle on your computer. For maximum security, you can store your cryptocurrencies on a dedicated hardware wallet such as a TREZOR wallet or a Ledger Nano X.
