What is Gas in Crypto Gas fees are the cost that users pay to have their transactions validated on the blockchain. Supply and demand determines the current gas rate. When demand is high fees are high. When demand is low fees are low. Rates fluctuate in real-time, based on the number of transactions waiting to be validated on the network.

What is gas in crypto? Since Ethereum is a PoW blockchain, miners use computer power to validate transactions. The introduction of gas fees helped to separate the cost of computational power used on Ethereum from the cost of the Ethereum cryptocurrency. Gas is measured in Gwei which is another word for a unit of about 0.000000001 ETH.
