ICO stands for an Initial Coin Offering. It is also regarded as an alternative form of crowdfunding for releasing a new crypto unit. Startups use ICOs as a means to raise development funds. They have been used to raise millions of dollars for blockchain-related projects. ICO is one of the easiest and most effective ways to attract investments.

Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

It's important to keep in mind that cryptocurrency markets are extremely volatile, making it difficult to accurately predict what a coin's price will be in a few hours, and even harder to give long-term estimates.
