Coinbase is a secure online platform for buying, selling, transferring, and storing digital currency.

Opposed to a custodial exchange that requires control of your funds, a non-custodial exchange allows you to  
trade without handing over your funds to a third-party and the ability to maintain control over your private  
keys. If you are the only person with access to your private keys, only you can choose what happens with your  
funds, and this is one of the reasons non-custodial exchanges can be extremely secure to use.
