LONG-SHORT RATIO. Great for BTC and crypto environment. Absolute values of long and short positions can be misleading as since time passes new market participants join the crypto space. Also, Long tend to be long time holders, while shorters tend to be short time shorter. It is the ratio of the two levels (no matter what they are) that is a better indicator than the two of them taken separately.

2. Click on the graph to create your long/short position. The green shaded area represents your target (potential profit), whereas the red shows your stop-loss area (potential loss). At the center, you can see the risk/reward ratio.
