How to Swap Token Bep2 To Bep20: Binance Smart Chain (Yield .

Metamask does not support the native Terra network, so you would not be able to send native LUNA or UST tokens to your Metamask wallet. However, it is possible to add LUNA and UST tokens to the ERC20 or Binance Smart Chain, so you can send the BEP20 or ERC20 versions of these tokens to your Metamask wallet.

its pretty simple. im not an expert with this stuff and am still learning myself but i can offer what i know. -- so assuming you have a coin base account- you will have an eth wallet connected to your coinbase account. in coinbase hit receive in your eth wallet and your coinbase wallet adress will pop up. copy that. then go into your metamask wallet an click send. put in your coinbase eth wallet and send it.
