

Futures Contract: These exchange-traded contracts are standardised and the payment is made at the beginning of the period and settled or rolled over each day until the end of the contract. Speculators use these contracts to try to make money on the changing price of the commodity and typically close them out before maturity.

I would not trade here. The reason a lot of us U.S. traders left despite loving the site is because the "PSA they put out to cover their asses" gives them the ability to close any account they realize is connecting from the U.S. and force you to send proof you aren't from the U.S.

What you need to do then is to connect your Ledger Nano, run the Fido U2F app (logo is id) and confirm the action on your device: When it's done, you can simply give a name to your security device. Binance restrictions on the name of the security key are not clear enough but basically you can't use anything except the standard alphabet characters (no spaces, no punctuation, no symbols, etc).
