The amount of leverage varies from one product to another. The highest leverage KuCoin Futures offers is up to 100x. For example, if a trader uses 100x leverage to long 5 BTC at 5000USD, he'll need 0.05 BTC (fees not included) as margins to open the position. If the price of the contract goes up by 1%, the trader will profit 100% of his margin.

Electroneum (ETN) is popular among online exchanges focused primarily on delivering mobile services. The top exchanges where you can trade Electroneum currently are: Huobi Global KuCoin BiKi BiONE HitBTC Sistemkoin, and Liquid. If you are new, you can find our simplified guide for purchasing crypto and more exchanges where you can trade here.

Investors can participate in the returns of a cryptocurrency via Exchange Traded Notes (ETNs). Most ETNs hold large parts of the invested assets in physical coins as collateral. In most European countries, there are no crypto ETFs due to the legal framework defined by the UCITS guidelines.

Crypto is not the stock market, and deviating away from trusted projects or trying to rely on technical analysis is very risky. TLDR: Unfortunately a lot of the newbies that are joining Crypto are completely ignoring even top 100 coins and are choosing to put their money in these shady "get rich quick" schemes which is nothing short of gambling.

This helps make the entry into the crypto industry more personalized and predictable for consumers, opening it up to a wider audience. From the standpoint of traditional finance, BarnBridge can be used to improve the effectiveness of stock trading. BarnBridge creates tokenized derivatives based on market fluctuations.
