What Is the Unique Point of Ultra (UOS)? The Ultra network holds several unique qualities, among which is its extensive application to the gaming industry. With the application of the Ultra system, online gamers have access to cryptocurrency services whereby they have access to liquidity, as well as an incentivized token system.

Controlling shares of the token have been burned meaning that no one can retrieve the initial liquidity provided to PancakeSwap to enable trading, and no one can make any alterations to the smart contract. That makes Saturna unriggable as there is no mint function to change the supply or alter the current tokenomics.

This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get your TradingView Web Platform integration started.
