A decentralized exchange is a cryptocurrency exchange where you can trade cryptocurrencies from your own wallet without trusting third parties. Decentralized exchanges are powered by smart contracts which allow users to trade cryptocurrencies directly with other users or through liquidity pools. Decentralized exchanges are non-custodial exchanges and based on smart contracts, so there is no need to trust a third party with your funds.

Orders placed via our ActiveTrader interface (each, an Order) are subject to the rates on this schedule. Gemini utilizes a maker-taker fee model for determining trading fees for all Orders. Liquidity-making Orders are charged different fees than liquidity-taking Orders. If you place an Order that is filled immediately, this Order takes liquidity from the marketplace and, therefore, you are considered a taker and will be charged a taker fee.
