

The CME Globex system was the first and today still remains one of the fastest global electronic trading systems for futures and options trading. "Trades on the system are executed and confirmed to the customer with millisecond precision". Average daily order volume continues to increase, while the response time for trades continues to decrease.

A private key is like a password a string of letters and numbers that allows you to access and manage your crypto funds. When you first buy cryptocurrency, you are issued two keys: a public key, which works like an email address (meaning you can safely share it with others, allowing you to send or receive funds), and a private key, which is typically a string of letters and numbers (and which is not to be shared with anyone).

BitFinex is an exchange that has been around since 2012. It is designed with seasoned and institutional traders in mind. It offers a wide selection of trading and lending options but can be difficult to navigate for new users. There is a large liquidity pool and tons of trading pairs.

At the same time a trader on a crypto lending desk concludes he could save money by replacing his short physical bitcoin position with CME Bitcoin futures. He calculates that he needs to sell those futures at a basis of plus \$100 dollars per bitcoin or higher. He sees the fund managers bid on the order book and hits it. The BTIC trade is executed.

Globex Trading Systems (GTS) designs and develops quality fully automated trading algorithms designed for the stock index futures and commodities markets. Mechanical trading systems eliminate all human emotion that is often attributed to the downfall of most discretionary traders.

API stands for Application Programming Interface. As the name already suggests, it is an interface used to link the ProfitBird platform with the exchanges. If you provide your ProfitBird account with the API Key and Secret of your Coinbase Pro account, then the ProfitBird Platform is able to invest and trade on your exchange account on your behalf. So the API Key and Secret act as a unique identifier for authentication.
