Volume is what makes exchanges money. They collect transaction fees on trades through their platform typically a percentage of the total value traded. Without a certain volume threshold, exchanges will ultimately fail to be profitable business ventures. For you, as a cryptocurrency investor, exchange volume is equally important. Exchanges are your best bet at buying, selling, and trading cryptocurrencies.

There are many strategies for solving a cryptoquote successfully and improving your time. Syndicated puzzle author Denise Sutherland recommends looking at one-, two- and three-letter words first. Start with any one-letter words, since there are only two words in the English language that are spelled with one letter: "I" and "a." And because all two-letter words include a vowel, thinking about them next is a good strategy, as you may be able to identify or eliminate a few vowels quickly.

Look for Common Letters The first step is to realize that the most common letters in the English language are E, T, A, O, and N, with I and S a close second. So, the first step to solving the puzzle is to look at what letters occur most often in the above gibberish, and work with them. M, R, and S appear three or four times each.
