What is fiat? Fiat also called fiat money or fiat currency, which is the legal currency established in the constitution of a country and issued and circulated by the government of that country. For example, the US legal currency is the US dollar, and the Chinese legal currency is the RMB. Since it is a government-issued currency that has no inherent value, the source of the value of fiat currency is that fiat currency owners believe that currency can continue to maintain purchasing power.

There are many strategies for solving a cryptogram successfully and improving your time. Syndicated puzzle author Denise Sutherland recommends looking at one-, two- and three-letter words first. This differentiation is bullshit.
