What is fiat? Fiat also called fiat money or fiat currency, which is the legal currency established in the constitution of a country and issued and circulated by the government of that country. For example, the US legal currency is the US dollar, and the Chinese legal currency is the RMB. Since it is a government-issued currency that has no inherent value, the source of the value of fiat currency is that fiat currency owners believe that currency can continue to maintain purchasing power.

What is Fiat Currency? How Is It Different From Crypto? A fiat currency is money that is not backed by a physical commodity like gold, but instead backed by the government that issued it. Most modern currencies, such as the U.S. dollar, euro, pound and yen, are fiat money. Fiat means an authoritative or arbitrary order.
