Margin trading is built on this thing called leverage, which is the idea that you can use borrowed money to buy more stocks and potentially make more money on your investment. But leverage is a double-edged sword that also amplifies your risk.

Margin in trading is the deposit required to open and maintain a leveraged position using products such as CFDs and spread bets. When trading on margin, you will get full market exposure by putting up just a fraction of a trades full value. The amount of margin required will usually be given as a percentage.
