A node is simply a computer that connects to a cryptocurrency's blockchain network. It can be used to process transactions, store data about those transactions, and keep track of other nodes on the network. Nodes are essential to supporting the cryptocurrency network, and without them, the system would not be able to function.

What Is A Full Node? A full node is a program that fully validates transactions and blocks. Almost all full nodes also help the network by accepting transactions and blocks from other full nodes, validating those transactions and blocks, and then relaying them to further full nodes.

The Ravencoin blockchain requires miners to solve computational puzzles that most hardware is capable of solving. The blockchain ensures that the puzzles dont increase too fast, or that it eliminates possible miners from the process. Developing a special mining algorithm isnt new, and it encourages decentralization.
