A node is simply a computer that connects to a cryptocurrency's blockchain network. It can be used to process transactions, store data about those transactions, and keep track of other nodes on the network. Nodes are essential to supporting the cryptocurrency network, and without them, the system would not be able to function.

This change mandated that the block height value be specified in the first item of the coinbase transaction. Prior to this, the coinbase script size was between 2 and 100 bytes. Currently the minimum length is 4 bytes which is needed to hold the blockheight in a VarInt.
