Cryptocurrency is a digital mode of payment that is decentralized. Decentralized services, like crypto, dont need a centralized authority which gives them the ability to be censorship-resistant, secure, and hack-proof. There is not one, but many cryptocurrencies in the market.

A cryptocurrency, crypto-currency, or crypto is a collection of binary data which is designed to work as a medium of exchange. Individual coin ownership records are stored in a digital ledger, which is a computerized database using strong cryptography to secure transaction records, to control the creation of additional coins, and to verify the transfer of coin ownership.
