The crypto currencies sure have the potential to do so. Though the possibility of crypto currencies replacing the fiat ones is solid, it comes with its own issues from the current standpoint.

What is fiat? Fiat also called fiat money or fiat currency, which is the legal currency established in the constitution of a country and issued and circulated by the government of that country. For example, the US legal currency is the US dollar, and the Chinese legal currency is the RMB. Since it is a government-issued currency that has no inherent value, the source of the value of fiat currency is that fiat currency owners believe that currency can continue to maintain purchasing power.

Launched in September 2017, KuCoin has grown to become one of the most popular crypto exchanges and already has 10 million registered users across 207 countries and regions around the world. About Us
