How Crypto Arbitrage Works. To make different exchanges via this method, you must first pay attention to crypto values on various platforms. When you see that a value is higher on one platform than the other, its time to make your move. In quick succession, youll buy the lower price crypto, then sell it at the higher price on the other .

Cryptocurrency arbitrage uses the same principle of arbitrage from traditional markets. Usually, this practice can be made using two different crypto exchanges that have different prices . To make the crypto arbitrage profitable, you need to buy crypto assets at a lower price and then sell them at a higher price on other exchanges.

What you need first, though, is a cryptocurrency wallet that acts in a similar way to a traditional online bank account. Except, it doesnt store your crypto money but keeps a record of your transactions. Use this guide to show you step by step how to create a cryptocurrency wallet and which platforms are the best ones to use.
