Sorry for the basic question but I recently invested in crv on crypto.com exchange. I would like to stake my holding but cannot do so through crypto.com. Do I need to transfer to something like metamask and then link the metamask wallet to the curve website? If so are there any ways to avoid the exchange fees? Is there another way of doing this?

A trading simulator is essentially a copy of the stock market on a virtual trading platform. These virtual platforms provide market data like you would generally see in your active trading account. But there's one big difference. In your active trading account, your trades are made using your money. So, when you lose, you lose real money.
