Opposed to a custodial exchange that requires control of your funds, a non-custodial exchange allows you to trade without handing over your funds to a third-party and the ability to maintain control over your private keys. If you are the only person with access to your private keys, only you can choose what happens with your funds, and this is one of the reasons non-custodial exchanges can be extremely secure to use.

biconomy (bico) has transformed the complexities of blockchain transactions by introducing a non-custodial, gas-efficient relay network and integrating the concept of meta transactions, which allows a user to conduct a transaction on the blockchain with a zero balance account and have any third party pay the transaction costs on the users
