IMO, kraken is the best exchange. It's the mix of many factors: They don't have as many altcoins as Binance but still many, they offer staking for some coins (although not many and not the best rates), they are a registered company in a country with a solid legal system and with real offices and known people (unfortunately that means you need to do their terrible KYC process), you can buy .

In the most basic sense, an AMM or automated market maker is basically a protocol, an algorithm, or a formula that helps in the pricing of assets. Rather than employing an order book model like traditional exchanges, the automated market maker algorithm helps in pricing the assets. Furthermore, you should also note that the formula for AMMs could differ for each protocol.

Automated market makers (AMMs) are a mechanism used by most decentralized exchanges to facilitate permissionless trading. AMMs make use of liquidity pools containing 2 or more assets, and prices are derived based on the proportion of each asset in that pool as well as the mathematical function used. Orders through an AMM are executed automatically via a smart contract that will calculate the trade prices algorithmically, including any slippage from the trade execution.

Automated market makers (AMMs) are part of the decentralized finance (DeFi) ecosystem. They allow digital assets to be traded in a permissionless and automatic way by using liquidity pools rather than a traditional market of buyers and sellers. AMM users supply liquidity pools with crypto tokens, whose prices are determined by a constant mathematical formula.
