The worlds second-largest crypto exchange certainly showed resilience on the day of the Coinbase IPO. A reference price of \$250 per share had been set for the stock. When trading commenced on the Nasdaq, it surged to \$381 thats a 52% improvement. Coinbase IPO price estimates were difficult to make from there.

IBKR is the best all around broker imo, but they won't take a \$1k account. You need a margin account to short, but you can't day trade in a margin account without \$25k (pattern day trader rules). You can day trade in a cash account, but then you have to wait for settlement. Tastyworks is \$2k if you want margin account, but no minimum for a cash .
