This API lets brokers build a bridge to connect their backend systems to the TradingView interface, so that broker partners then can be supported on the TradingView Web Platform. The integration is very straightforward. The broker builds a REST Web API on its own servers based on our specification so that it can be connected to TradingView. TradingView provides a sandbox and required technical assistance to get

your TradingView Web Platform integration started.

Send money from trustwallet to Coinbase - English - Trust Wallet

Coinbase Wallet is a user-controlled, non-custodial product. The app generates a 12 word recovery phrase which is what gives you, and only you, access to your account to move received funds. Coinbase will never have access to this seed, meaning that we cannot move funds on your behalf even if you lose access to your recovery phrase.

The wallet you get with a basic account is also a Coinbase wallet, even though it is not called that. That is de facto because you get a wallet with the basic account whether or not you ever get the app. If you don't get the app, then the only "coinbase wallet" you have is the one on coinbase.com. This differentiation is bullshit.
