Crypto margin trading is a trading practice that allows traders to gain greater exposure to a specific asset by borrowing capital from other traders on an exchange or the exchange itself. . A margin trader that opens a trade with 100X leverage , for example, will multiply their exposure and potential profit by 100 times.

Orders placed via our ActiveTrader interface (each, an Order) are subject to the rates on this schedule. Gemini utilizes a maker-taker fee model for determining trading fees for all Orders. Liquidity-making Orders are charged different fees than liquidity-taking Orders. If you place an Order that is filled immediately, this Order takes liquidity from the marketplace and, therefore, you are considered a taker and will be charged a taker fee.
