Initial coin offerings, also referred to as ICOs or token sales, are a way to fund cryptocurrency projects. An initial coin offering is used by startups to bypass the rigorous and regulated capital-raising process required by venture capitalists or banks. In an ICO campaign, a percentage of the cryptocurrency is sold to early backers of the project in exchange for legal tender or other cryptocurrencies, but usually for Bitcoin.

In some cases, ICOs are also called Token Generating Event (TGE). In an ICO tokens are sold or auctioned. The core idea of ICOs is to collect funds from third parties for an idea or business model.
