Such nodes require extraordinary amounts of storage and memory. It often takes hours to join and sync to the network with a full node. Running a full node with cloud services will likely require you to pay a monthly service fee. Compare this with using a light node. These take up less space and can be small enough to run on mobile devices.

Each cryptocurrency has its network with a set of nodes communicating with each other to verify blocks. Bitcoin, for instance, has a bitcoin network and a set of nodes that communicate with each other randomly. Each node has the authority to verify and validate all Bitcoin transactions and validate every block.
