The wallet you get with a basic account is also a Coinbase wallet, even though it is not called that. That is de facto because you get a wallet with the basic account whether or not you ever get the app. If you don't get the app, then the only "coinbase wallet" you have is the one on coinbase.com. This differentiation is bullshit.

Coinbase Wallet is a user-controlled, non-custodial product. The app generates a 12 word recovery phrase which is what gives you, and only you, access to your account to move received funds. Coinbase will never have access to this seed, meaning that we cannot move funds on your behalf even if you lose access to your recovery phrase.
