What you need to do then is to connect your Ledger Nano, run the Fido U2F app (logo is id) and confirm the action on your device: When it's done, you can simply give a name to your security device. Binance restrictions on the name of the security key are not clear enough but basically you can't use anything except the standard alphabet characters (no spaces, no punctuation, no symbols, etc).

Ethereum, like Bitcoin, is an open source project that is not owned or operated by a single individual. Anyone with an internet connection can run an Ethereum node or interact with the network. Popular Ethereum-based innovations include stablecoins (which are pegged to the dollar by smart contract), decentralized finance apps (collectively known as DeFi), and other decentralized apps (or dapps).
