In the preview screen (where you finalize the trade) it states \$0 fee and a total of \$5000 in quick will be converted. After the trade is finalized I'm left with \$4,700. I decided to convert the \$4700 back to Eth and see what happens and low and behold they deducted \$250 and left me with \$4450.

Coinbase Pro charts are messed up as of 11/7/21 at 1:00 AM EDT. I don't know what happened, but suddenly, all candlesticks are drawing across the screen, instead of on top of each other, smearing the graph with every change next to each change, instead of on each time interval. Anyone having the same issue?

Crypto arbitrage is a form of trading that involves simultaneously buying and selling cryptocurrencies from different exchanges. Arbitrage traders make profit from crypto price differences between exchanges. This involves buying assets for the lowest price available and selling for the highest. The process of arbitrage trading usually gives relatively small returns on each trade. Also, traders must place their orders extremely fast in order to have advantage among other players.
