Many people compare HitBTC to Binance since both exchanges are crypto only and are relatively lenient regarding the coins they list and who they accept as a customer. When you compare both exchanges, it seems that Binance has lower fees (0.1% flat) and a better reputation, while HitBTC has a better user interface and a wider selection of features.

Based on everything that has been highlighted so far, HitBTC is a solid and established exchange that can be used to access super low trading fees, as well as an unparalleled trading engine and API. The exchange is best suited for advanced users, but beginners can also get the hang of it in due time.

How to close my account If you no longer need your HitBTC account, you may just stop using it. But please keep in mind that the traces of your transactions will remain in the network forever: this is the point of blockchain.
