API stands for Application Programming Interface. As the name already suggests, it is an interface used to link the ProfitBird platform with the exchanges. If you provide your ProfitBird account with the API Key and Secret of your Coinbase Pro account, then the ProfitBird Platform is able to invest and trade on your exchange account on your behalf. So the API Key and Secret act as a unique identifier for authentication.

The Osmosis platform operates using the Keplr wallet, which supports Cosmos Inter Blockchain Communication (IBC). Keplr is used for staking at Osmosis. To create a wallet, go to the Keplr website.
